Commercial Cordless Battery Vacuum Cleaner

PERFECTION IS IN THE DETAIL SATISFACTION IS IN PERFECTION

Vacuuming Control

The regulator on the bent end piece (BEP) controls suction at the nozzle.

Opening the regulator diverts air and reduces suction. This feature is essential when vacuuming loose fabrics such as curtains.

"Hot Shoe" Battery Holder

Conveniently located for easy access. Slide the battery into the holder, and it will snap into position. Press the battery button to release it and slide it out. You already know how to use it.

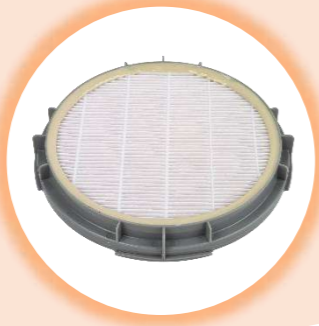

Stainless Rods

Stainless steel is inert to corrosion from cleaning chemicals. Its use protects your investment. Stainless steel is lightweight and strong, ideal for easy operation and commercial use.

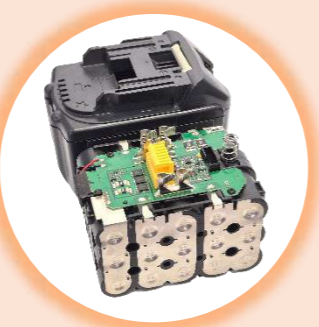

HEPA Filter

Located below the cloth filter bag, the HEPA filter is designed to filter residual sub-micron sized dust. The filtration efficiency of the HEPA filter reduces respiratory health risks from vacuumed fine dust emissions.

Cloth Filter Bag

The bag material uses scrim-reinforced synthetic fiber to strengthen and prevent fiber rot. The homogeneous fabric makes cleaning easy, and the internal calendared surface allows it to shed dust. The antimicrobial properties are highly effective. It eliminates harmful microbes, including those that cause odor. The hand shaker provides easy emptying and minimizes direct contact with dirt.

High Energy Battery Pack

Supplied in pairs, each battery pack contains 15 high-energy Li-ion cells, allowing Elva to deliver up to **70 minutes of vacuuming at FULL POWER.**

Hi-Flo Paper Filter Bags

Hi-Flo paper filter bags are economical and convenient for dust disposal. It allows you to focus on vacuuming instead of filter maintenance. Using them is healthier for you and better for the environment.

Backpack Harness

Contoured for ergonomics and padded for comfort, it uses durable materials and is designed for easy adjustability. Stress-free vacuuming for hours in total comfort. Economical tools free parts replacement when needed.

Vacuum Hose

"Crushproof," means heavy-duty commercial quality. Anti-microbial properties provide odor control and added user hygiene. A smooth bore reduces losses and increases performance for better cleaning.

Battery Engine

It's a powerful high airflow motor that drives our turbine brush with ease. High airflow provides better cleaning. Robust and durable, reduces replacement costs and provides real savings. High efficiency conserves battery energy.

Speed Booster

Improves airflow, providing superior cleaning. The triple seals, enhance motor suction and that's better performance.

Battery Charger

The dual port DC18RG rapid charger minimizes charge time and increases productivity. Innovative pulse charging extends battery life. It's a good, wise investment. The charger has air cooling and electronic protection for the battery pack while charging. The dashboard indicators and tone alert you when charging has been completed.

ENDURANCE MOTOR

Elva has a tough, long-life vacuum motor suited for demanding commercial applications. To use, power up Elva, and the 300W motor will deliver **full power 100% of the time.**

BATTERY PACKS

Two Li-ion battery packs provide a substantial 378Wh of energy, allowing vacuuming for up to **70 minutes at full power.** Connecting the battery to the "hot shoe" holder is easy and intuitive.

BATTERY CHARGER

The vacuum cleaner's rapid dual-port pulsed charger is designed to minimize charge time. It can recharge two flat batteries in **105 minutes**, significantly boosting productivity and ensuring long cleaning sessions.

VACUUM CLEANER WEIGHT

The vacuum cleaner weighs **only 5.7kg.** When wearing, the weight is not noticeable as the battery is positioned close to the body and above the hips.

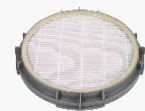

SPECIFICATIONS

Type	Dry
Capacity	4L
Carry Weight	5.7kg with battery, excluding hose.
Sound	61 dBA 1.5m
Motor	300W Brushed
<ul style="list-style-type: none"> Motor Suction 	13kPa
<ul style="list-style-type: none"> Motor Airflow 	29l/s
<ul style="list-style-type: none"> Motor Air Power 	130W
Airflow at Nozzle	25l/s
Battery Power	2 x 18V 10.5A (378Wh) Li-ion Batteries
Battery Run Time	70 minutes
Battery Charge Time	105 minutes
Warranty	1 year Battery & Charger 2 years Body and Motor
